Interpellations, Questions and Replies of the National Assembly

African Drum

Patent journal, including trade marks, designs, and copyright in cinematograph films

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

Kenya Gazette

Official Gazette of the United States Patent and Trademark Office

Case studies of metropolitan cities in nine African countries - from Egypt in the north to three in West and Central Africa, two in East Africa and three in Southern Africa - make up the empirical foundation of this publication. The interrelated themes addressed in these chapters - the national influence on urban development, the popular dynamics that shape urban development and the global currents on urban development - make up its framework. All authors and editors are African, as is the publisher. The only exception is Göran Therborn whose recent book, Cities of Power, served as motivation for this volume. Accordingly, the issue common to all case studies is the often conflictual powers that are exercised by national, global and popular forces in the development of these African cities. Rather than locating the case studies in an exclusively African historical context, the focus is on the trajectories of the postcolonial city (with the important exception of Addis Ababa with a non-colonial history that has granted it a special place in African consciousness). These trajectories enable comparisons with those of postcolonial cities on other continents. This, in turn, highlights the fact that Africa - today, the least urbanised continent on an increasingly urbanised globe - is in the thick of processes of large-scale urban transformation, illustrated in diverse ways by the case studies that make up the foundation of this publication.

Nuts & Bolts

Kenya Gazette

Divided into three thematic parts to guide the reader, this important volume documents the development and implementation of refugee policy in South Africa over a 10-year period from 1996 until 2006. In doing so, it addresses issues of detention, gender, children and health as well as welfare policies for refugees. The contributions, all written by academics and practitioners of refugee protection, vividly illustrate the tangible shifts and concerns of a process that is not only aimed at establishing policies and legislation but also practices concerning refugees.

‘Africa Forms the Key’

The future of Africa is bright. Innovation, and not aid, is the answer. Mclean Sibanda believes that Africa must be deliberate about its economic development and that change requires champions, and importantly, fertile enabling environments. In Nuts & Bolts you will gain unique perspectives on challenges faced by leaders overseeing a turnaround in any organisation, and the thought processes behind innovation initiatives that yielded value. Mclean provides practical insights on innovation and entrepreneurship for Africa’s development through a narrative of his seven years of repositioning Sub-Saharan Africa’s first internationally recognised Science and Technology Park, The Innovation Hub. Included, too, are reflections from entrepreneurs who have all gone on to build successful businesses which will be useful for anyone working on a start-up or innovation, particularly institutions set up to create new products or services. The musings of various successful entrepreneurs and ecosystem builders provide relevant context, inspiration and examples as to how best make use of support programmes provided by incubators and organisations similar to The Innovation Hub. Nuts & Bolts is a book about hope, it is full of stories about real people and companies who are making a difference, with testimonies of entrepreneurs, experienced ecosystem builders and innovators. It captures deep insights from the considerable time Mclean has spent with entrepreneurs and innovators, on the importance of inclusive innovation and entrepreneurship, and provides a mix of global experiences and entrepreneurship narratives that eloquently sketch out the ‘nuts and bolts’ for entrepreneurship and innovation. ‘I hope this book will be of value to those wanting to make a difference, or be the difference, in solving many challenges faced by our world today, and in developing new products and services to create new market opportunities for a better world.’ – Mclean Sibanda

Land Use Management and Transportation Planning

This handbook provides a comprehensive and cutting-edge strengths-based resource to the subject of Indigenous resilience. Indigenous Peoples demonstrate considerable resilience despite the social, health, economic, and political disparities they experience within surrounding settler societies. This book considers Indigenous resilience in many forms: cultural, spiritual, and governance traditions remain in some communities and are being revitalized in others to reclaim aspects of their cultures that have been outlawed, suppressed, or undermined. It explores how Indigenous people advocate for social justice and work to shape settler societies in ways that create a more just, fair, and equitable world for all human and non-human beings. This book is divided into five sections: From the past to the future Pillars of Indigeneity The power in Indigenous identities The natural world Reframing the narrative: from problem to opportunity Comprised of 25 newly commissioned chapters from Indigenous scholars, professionals, and community members from traditions around the world, this book will be a useful tool for anyone seeking a deeper understanding of manifestations of wellness and resilience. This handbook will be of particular interest to all scholars, students, and practitioners of social work, social care, and human services more broadly, as well as those working in sociology, development studies, and environmental sustainability.

People on the Move: A new approach to cross-border migration in South Africa

Migration and Refugee Policies

The authors identify conditions under which firms seek higher rather than lower regulation in a context of weak regulatory capacities by engaging in self-regulation or partnering up with the government and/or NGOs. They analyse how firms in the automotive, food, textile, and mining sectors fight environmental pollution and HIV/AIDS.

Index of Trademarks Issued from the United States Patent and Trademark Office
In developing countries, access to affordable medicines for the treatment of diseases such as AIDS and malaria remains a matter of life or death. In Africa, for instance, more than one million children die each year from malaria alone, a figure which could

New Forms of Procurement

This book by Andrew P. Miller, examines the role of ecotourism in Costa Rica and the way in which it intersects with policies to attract foreign direct investment. This authoritative exploration is essential for students and scholars interested in Latin American politics and history, development studies, and environmental sustainability.

South Africa's Insurgent Citizens

Urban and regional planning is a spatial design practice that brings limitations to the intervention in natural areas to ensure a balance between population growth, housing, and employment in residential areas. It includes spatial design that enables living creatures to live while planning the interventions to ensure suitability to ecology, geology, climate, and land structure since intervention in nature should be balanced. In this context, the profession generally includes regional, spatial and urban planning, urban transformation that involves the urban decline areas in the city, urban renewal and protection, urban transportation, and urban management. Therefore, it is believed that this book will be useful for those who work in this area on a practical or academic basis and follow the innovations in the profession.

Advancing Refugee Protection in South Africa

The interface between land use management and transportation planning represents probably the most important spatial impact in sustainable land use, mobility and transportation development. Prior to this book, only limited attempts have been made to integrate these topics as to enhance smart growth and sustainable development principles within spatial systems. The approach followed differs internationally and specifically between different planning and transportation authorities. The spatial impacts of land use and transportation serve as the main catalyst in urban form, development and its associated problems. These impacts represent severe consequences from a built and environmental development perspective. All of these are covered in the book and its supporting chapters. The focus of the book is the application of best practice principles in managing the interface between land use management and transportation planning. Internationally the practice is the promotion of more sustainable urban and rural forms supported by improved levels of accessibility through the application of smart growth and sustainability principles. The focus however remains to successfully optimise land use and transportation integration. The structuring used within each of the chapters provide the reader with the basic and applicable theory and practical knowledge to attain system wide integration and sustainability within the dynamics of spatial and transportation systems. The inclusion of specific theme related case studies endorses the relevancy of this book’s topic.

South African Language Rights Monitor 2002

New Zealand Patent Office Journal

The South African Language Rights Monitor (SALRM) Project surveys the mainstream newspapers of South Africa with a view to compile annual reports on the developments on the language front in the country. While the main focus is on language rights and language (rights) activism, the yearly Monitor also covers other language-related problems, including name changes, as well as aspects of language promotion. For anybody interested in subjects ranging from the (proposed) renaming of Bloemfontein, Louis Trichardt, Pretoria, Port Elizabeth and Johannesburg International Airport to the incident of Johann Rupert withdrawing his advertisements from a British magazine, and from the saga on mother-tongue education at schools to the language policy in the judicial system and the success of the South African films Yesterday and U-Carmen eKhayelitsha, the SALRM 2005 provides a rich source of information. The SALRM Project is housed in the Department of Language Management and Language Practice at the University of the Free State.

The Routledge International Handbook of Indigenous Resilience
The science of the virus and its effects and the clinical approaches to its treatment and transmission prevention are placed in the context of the history and epidemiology of the HIV-AIDS pandemic. Each organ system of the body is explored in relation to the manifestations of the disease, treatment now and in the future, as well as what the disease has taught us about the immune response. The science of epidemiology, which is so important in allowing for tracking of the disease and potential limitation of transmission, is another aspect of AIDS explored in detail. The pandemic manifests differently in different parts of the world, and the relevance of the volume is enhanced by its international group of contributors. No other text provides the historical and epidemiological context of this disease along with an update of diagnosis and treatment. The underlying science and epidemiology of AIDS are not neglected, so the student or clinician who is treating patients with AIDS can gain a full understanding of HIV/AIDS in individual patients and in their communities.

**Medien und Techniken der Wahrheit**

Is South Africa on a long-term decline? The New South African Review revives the tradition of critical, analytical scholarship developed by the South African Review in the 1970s and 1980s. Accessible to a wide readership and drawing upon authors from well beyond academia, its objective is to be informative, discursive and, at times, downright provocative. It seeks to provide contemporary commentary and engage with current controversies. The first volume in the series, 2010: Development or Decline? ranges widely across the implications of the international crisis for the economy, the threats to our fragile ecology of present economic strategies, through to the state of the ANC and the public service, issues around service delivery, migration, HIV-AIDS, land reform, crime, the sexual behaviour of our youth, and much more. Posing the provocative question of whether South Africa is embarking upon a long-term decline, the volume simultaneously argues the potential for a society promised upon social equality, social coherence and sustainability. This collection will appeal to both national and international audiences interested in engaging with the multiple dilemmas and challenges facing contemporary South Africa.

**Urban Form and Accessibility**

The last three decades have seen the evolution of Public-Private Partnerships (PPPs) and Relationship Contracting (RC) as alternative procurement approaches to traditional methods of delivering public infrastructure. The potential for growth in these new forms of procurement has led to an on-going debate on the nature of requirements, particularly in terms of policy development, encouraging private investment and value for money. A key argument for Governments to procure projects using PPPs and RC is that the process delivers better value for all the stakeholders, including the community and asset end-users. This wide-ranging study of such crucial procurement issues includes international historical context, collaboration and risk management, with a focus on sustainable procurement approaches. The international significance of PPPs and RC procurement is reinforced with case study examples from the UK, Europe, North America, South Africa and the Asia-Pacific. It features cutting-edge research from around the world on subjects such as: Reviews and reflection of the PPP approach Project Alliancing Implementation of RC in developing countries Changes in procurement policy Value for money, collaboration and stakeholder involvement Growth and emergence of PPPs in Asia Risk management Including contributions from some of the world’s most prominent academics and practitioners in this field, it is a crucial guide to the strategic choices governments now face for the provision of infrastructure, between using ‘public’ or ‘private’ mechanisms, or a combination of the two.

**Rogue**

**Census 2001**

This book examines the work of prominent South African geologist Alex Du Toit as a means of understanding the debate around continental drift both in segregation-era South Africa and internationally. It contextualises Du Toit’s work within a particularly formative period of South African science, from the paleoanthropological discoveries that sparked debates about the origins of humankind to Jan Smuts’ own theory of holism. Beyond South African scientific discoveries, the book sets Du Toit’s work against a backdrop of ideological struggles over space, both domestically in terms of segregation and nationalism, as well as internationally as South Africa sought to assert its position within the Commonwealth. These debates were embodied by Du Toit’s work on the theory of continental drift, which put Africa – and South Africa – at the centre geologically and geographically. The author also focuses on the divisions in geology caused by drift theory, tracing the vigorous intellectual debate and dissent indicative of the ideological milieu within which scientific thought is constructed. It traces the history of continental drift from its inception in the nineteenth century and later work of Alfred Wegener, which was both elaborated upon and substantiated by Du Toit. The study further focuses on Du Toit’s research on continental drift in South African and South America, and the geological, fossil and climatological evidence used to bolster this theory.

**Upgrading Gauteng's Informal Settlements**

The prohibition against corporal punishment is an integral part of the broader transformation of South African education. The prohibition seeks to replace South Africa’s violent and authoritarian past with an ethos respectful of human dignity and bodily integrity.

**Help Yourself**

Twenty years on from South Africa's first democratic election, the post-apartheid political order is more fractured, and more fractious, than ever before. Police violence seems the order of the day – whether in response to a protest in Ficksburg or a public meeting outside a mine in Marikana. For many, this has signalled the end of the South African dream. Politics, they declare, is the preserve of the corrupt, the...
self-interested, the incompetent and the violent. They are wrong. Julian Brown argues that a new kind of politics can be seen on the streets and in the courtrooms of the country. This politics is made by a new kind of citizen – one that is neither respectful nor passive, but instead insurgent. The collapse of the dream of a consensus politics is not a cause for despair. South Africa’s political order is fractured, and in its cracks new forms of activity, new leaders and new movements are emerging.

Holding Their Ground

Migration and refugee movements are becoming increasingly prominent features of the millennial world. Persistent disparities in wealth and job opportunities and continued political conflict and repression impel growing numbers of people to seek work and safely outside their own countries. However, many governments and their citizens remain reluctant to open their borders to foreigners. For this reason, in one country after another, migration and refugee questions have become politically controversial, creating the need for a sound understanding of policy options and their implications. This book brings together five international scholars who survey key aspects of the international experience of migration and refugee policies. In Part II, drawing on the lessons presented by international experience, a team of South African experts address the thorny migration and refugee issues confronting that country’s new democratic government.

New South African Review 1

This volume contains 20 manuscripts presented during the Materials Science & Technology 2017 Conference (MS&T’17), held October 8-12, 2017 at the David L. Lawrence Convention Center, Pittsburgh, PA. Papers from the following symposia are included in this volume: 9th International Symposium on Green and Sustainable Technologies for Materials Manufacturing and Processing • Advances in Dielectric Materials and Electronic Devices • Construction and Building Materials for a Better Environment • Innovative Processing and Synthesis of Ceramics, Glasses and Composites • Materials Issues in Nuclear Waste Management in the 21st Century • Materials Development for Nuclear Applications and Extreme Environments • Materials for Nuclear Energy Applications • Nanotechnology for Energy, Healthcare and Industry • Processing and Performance of Materials Using Microwaves, Electric and Magnetic Fields, Ultrasound, Lasers, and Mechanical Work – Rustum Roy Symposium These symposia provided a forum for scientists, engineers, and technologists to discuss and exchange state-of-the-art ideas, information, and technology on advanced methods and approaches for processing, synthesis, characterization, and applications of ceramics, glasses, and composites. Each manuscript was peer-reviewed using The American Ceramic Society’s review process. The editors wish to extend their gratitude and appreciation to their symposium co-organizers, to all of the authors for their valuable submissions, to all the participants and session chairs for their time and effort, and to all the reviewers for their comments and suggestions. We hope that this volume will serve as a useful reference for the professionals working in the field of materials science.

Advances in Ceramics for Environmental, Functional, Structural, and Energy Applications

The story of a ‘rogue unit’ operating within the South African Revenue Service (SARS) became entrenched in the public mind following a succession of sensational reports published by the Sunday Times in 2014. The unit, the reports claimed, had carried out a series of illegal spook operations: they had spied on President Jacob Zuma, run a brothel, illegally bought spyware and entered into unlawful tax settlements. In a plot of Machiavellian proportions, head of the elite crime-busting unit Johann van Loggerenberg and many of SARS’s top management were forced to resign. Van Loggerenberg’s select team of investigators, with their impeccable track record of busting high-level financial fraudsters and nailing tax criminals, lost not only their careers but also their reputations. Now, in this extraordinary account, they finally get to put the record straight and the rumours to rest: there was no ‘rogue unit’. The public had been deceived, seemingly by powers conspiring to capture SARS for their own ends. Shooting down the allegations he has faced one by one, Van Loggerenberg tells the story of what really happened inside SARS, revealing details of some of the unit’s actual investigations.
